

Join us for these **6 days of concentrated Astrology** studies in the heart of the Rocky Mountains, to deepen your **understanding of predictive methods and planetary cycles.**

We have rented a house right by the magical town of **Boulder in Colorado**, known for its vast beauty and alternative communities. We will explore the Rockies after study time and indulge in **heart opening yoga practice!** Allow these amazing landscapes to take you on an soulful journey...

Participant's charts will be analyzed so that each one is able to personalize the content of the workshop and gain insight into one's place in the times to come.

This workshop is **Segment 6** of renowned astrologer Maurice Fernandez's complete course, but can be attended by people who have not taken previous segments.

Workshop Content:

- **Transits:** the great planetary cycles influencing our personal charts and the collective trends. We will explore the influence of each planet individually as well as combined planetary influences so that future trends can be adequately foreseen.
- **Solar Arcs:** a uniquely precise prediction technique that offers great perspective on cycles of creativity, and beyond...
- **Progressions:** along with Solar Arcs, we will delve into the Secondary Progression technique to trace cycles of becoming and future trends.
- **Planetary Nodes:** a rare exposure to the fascinating material on the Nodes of all planets—delving into the heart of collective consciousness.

Workshop Optional Activities:

These activities are added to create a truly holistic learning experience, beyond mere intellectual stimulation. Working on the different bodies of our consciousness paves the way for an internal transformation along with the insights gained during the study.

- **Daily Kundalini Yoga Practice:** Getting into the body, focusing strong on the third eye and allowing intuition channels to open for cosmic inspiration!

- **Trips to the Rockies:** the beauty of the Rocky Mountains is not only an esthetic feast—it holds the energy of ancient Native American tribes who used to roam these lands and nourish their souls from spiritually honoring the land—among them chief Niwot.

- **Community and Fun:** A beautiful house is rented in the mountains where the workshop is held and where out of town participants will be staying—we will cook, dine, and watch movies together...share our passion for the stars and create ties that may remain beyond our stay. Students do not need to be mere strangers sitting in a classroom, but friends and even a tribal family!

Costs:

- **Workshop costs** – By May 15: \$450
After May 15: \$485
Returning Students: \$75
Complete Course Students: No additional charge
- **Accommodation costs – From July 14 to 21, 2011**
